## **Generate a Work Order**

Last Modified on 12/19/2023 4:22 pm EST

## **Overview**

A **Work Order** is a task or a job for a customer, that can be scheduled or assigned to someone. Such an **order** may be from a customer request or created internally within the organization. A **Work Order** may be for products or services.

## **Generating a Work Order**

Every Work Order (WO) consists of a number of Steps /Operations. This describes the labor and manufacturing involved with producing the Item in question. All Steps are drawn from the Profile List > Steps.

Each Step can contain one or more Components. These are the Items that go into producing the final product.

To process a Work Order follow the steps below:

Open the *Side* menu and click on Create New.
 From the drop-down menu, select Work Order.

3. On the following screen, enter the **Bill of Material number** to be used to assemble this product. You can use any Bill of Material number you have established in the system. Click the *Next>>* **button.**

9 552					

4. Set the Quantity Ordered, Quantity and Date parameters. You can add Memo and Instruction for your production team.

- Enter the **Quantity Ordered** to be produced.
- For the Quantity field, enter the actual amount that was produced for this Work Order.
  - You will need to come back to this screen when your items have been produced and work order completed.
- The date will auto fill. If there is a need to change it, click on the calendar and select your date.
- In the Promise Date field , click on the calendar and select the desired date.
- Under the Memo & Instructions, type in the information required for this work order completion.

If you have entered instructions under the Bill of Materials, these instructions will carry over to the Work Order document.

5. Click on **Save** to continue to the Work Order Screen.

The following screen will display the Work Order which includes the Steps and Items needed to complete the order.

- The Work Order will remain in a **Waiting** status until it is allocated to the production team.
- By clicking on the **Edit** icon, you can review or add additional information to the Work Order.
- Under the Item section, the Item #/Name, Quantity Ordered, and Quantity will be displayed.
- Under General, the Work Order #, Date, and Due Date will be displayed.
- Under the Summary section, the Total Std. Const will be displayed.

Under the Steps and Components tab you can complete the following:

- You have the ability to **+Add** addition steps to your production.
- Under the ACTIONS you can click the Note icon to make changes or edits to your Steps and Items.
- Enter additional Items to your Work Order.

Under the Memo and Instruction tab, the system allows you to Edit and add information needed for the Work Order.

The Attachment tab enables the user to enter an attachment to the Work Order (i.e. Pictures, Diagrams, Plans, etc.)

Under the Open Activities tab, you can add an Event and Add Task to the individual(s) in the Production Team. This in term can keep track of current assignments and parties notify when the Work Order has been completed.

When the +Add Event icon is selected, complete the following:

- Assign to a member of your team.
- Select the type of activity.
- Select a beginning and end date for the event.
- Enter a Subject (include the Work Order number)
- Set an alarm/and time.
- Type in a Description.
- Under the Invitees tab, you can select additional personnel to invite. Click on Add to include other invitees.
- The Phone and email boxes will be displayed only when it relates to a Contact, Customer or Vendor.
- Click on the Save icon when completed.
