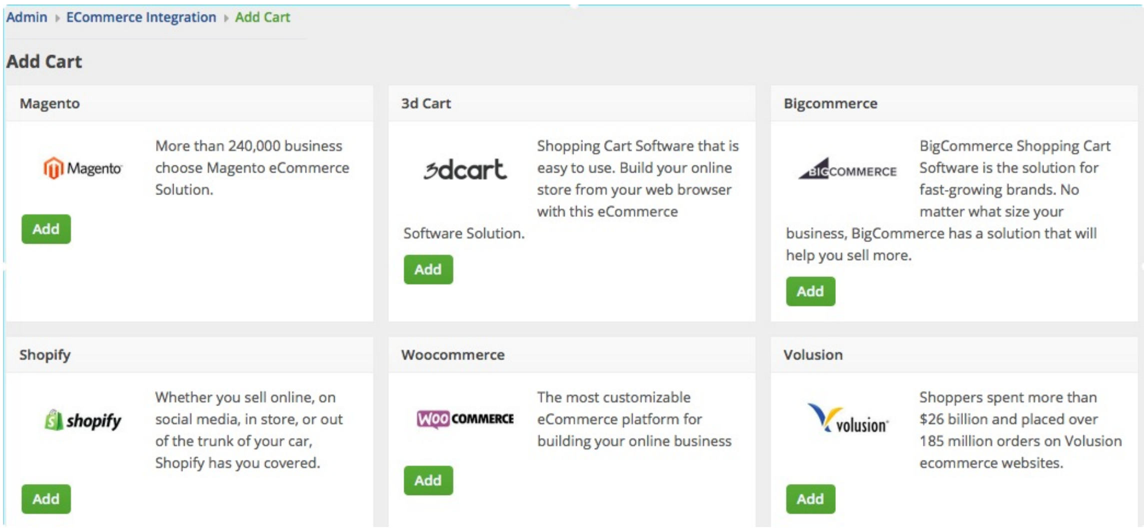
Carts: Generating Connection Credentials

Last Modified on 02/28/2018 7:16 pm EST

Overview

Order Time has several integrator e-commerce partners. The partnership with these platforms makes inventory and order processing system significantly efficient.



In Order Time, the e-commerce partners are presented as 'Carts'. When you are setting up your E-commerce Integration in Order Time, you have to add the appropriate connection settings for the cart of your choice.

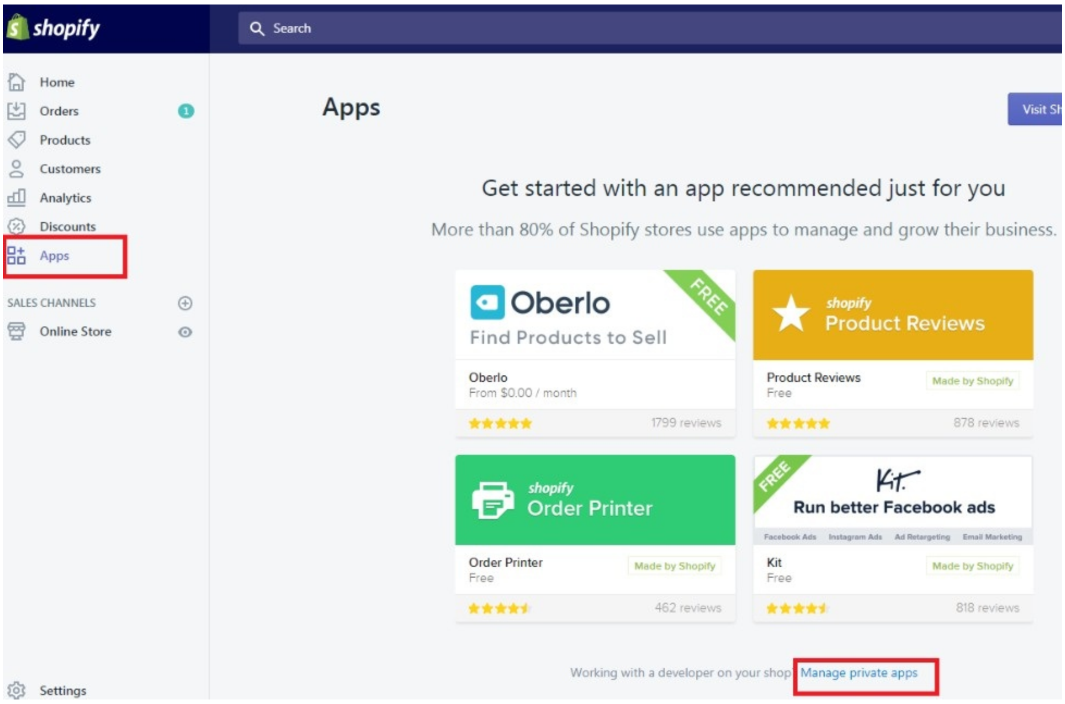
This article will show you the steps for setting up your Cart and generating connection credentials for the Cart that you selected in Order Time.

- Shopify
- BigCommerce
- 3dcart
- Volusion
- Magento V1
- Magento V2

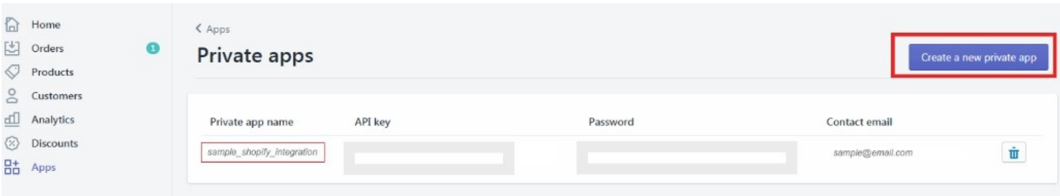
- WooCommerce

Shopify

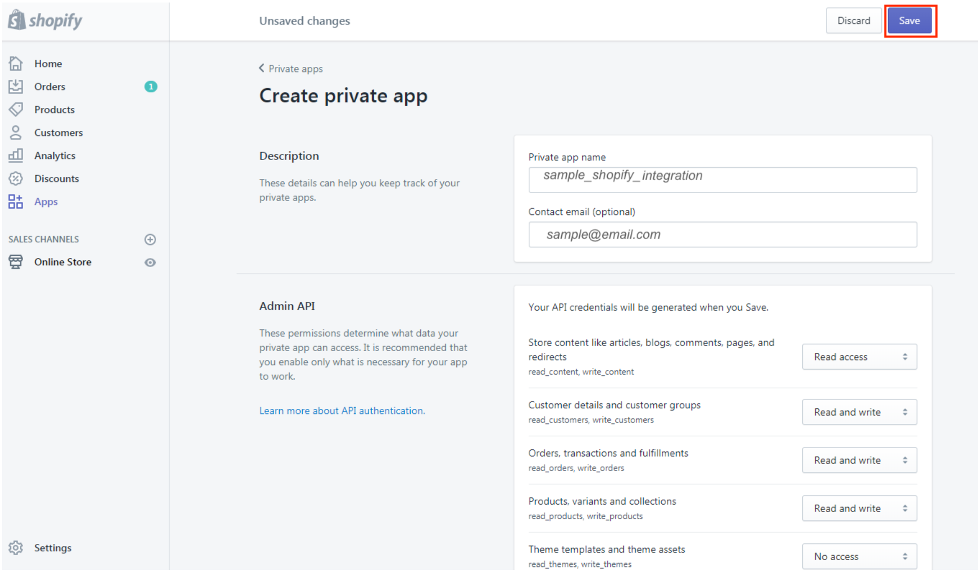
1. Log in to **Shopify** .
2. Click **Apps** located on the left side of the interface.
3. Click **Manage Private Apps** which is near the bottom of the interface.



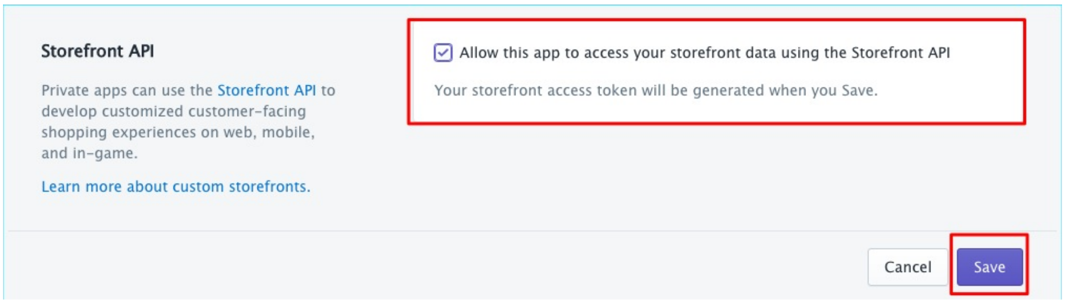
4. Click the ***Create New Private App*** button.
5. Enter the information in the ***Private app name*** (integration name) and ***Contact email*** fields.



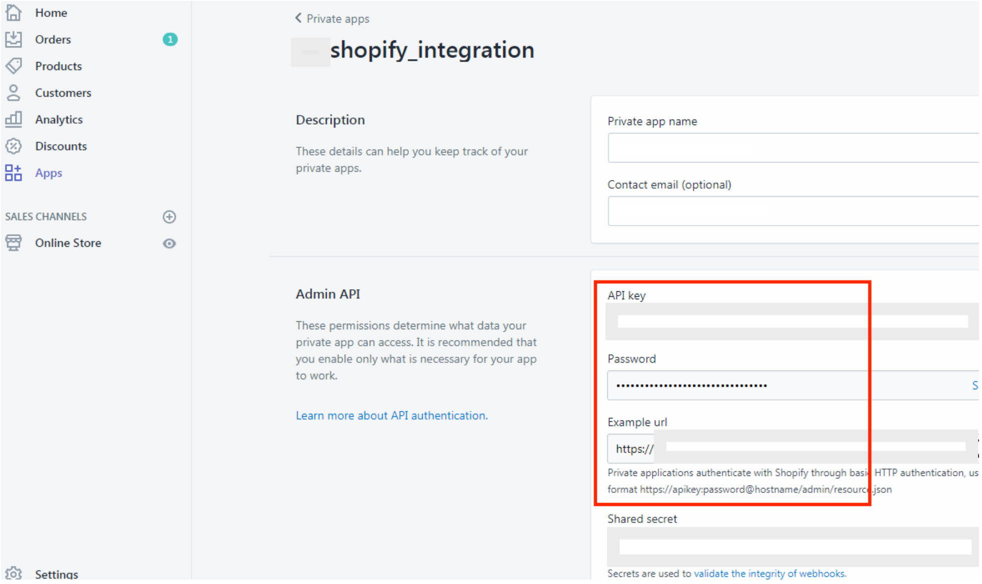
6. Make sure the following ***Permissions*** are Set to '**Read & Write**'
   - Customer details and customer groups
   - Orders, transactions and fulfillments
   - Price rules
   - Product information
   - Products, variants and collections
   - Shipping rates, countries and provinces



7. Check '*Allow this app to access your storefront data using the Storefront API*'.
8. Click **Save**.



9. The page will refresh and you will see the following information. Copy and paste to save them because you will need these information (credentials) for adding the connection settings in Order Time .
    - API Key
    - Password - Click **Show**.
    - URL



Top
