CustomerAddress

Last Modified on 05/20/2025 11:26 am EDT

Customer Address Object

Customer Address is a Child object of Customer and Lead.

- End Point
- Properties
- Json Sample

End Point

/customeraddress

GET, POST, PUT, DELETE

GET and DELETE requests expect parameters customerId AND id of type Int32.

Merging two Addresses via API

POST: E.g /customeraddress/Merge?
customerId=10&addressIdToMerge=2&addressIdToMergeInto=1

- The paramater customerId is the Id of the Customer (Int32).
- addressIdToMerge is the Id of the Address (Int32) that you want to delete.
- addressIdToMergeInto is the Id of the Address (Int32) that you want to keep.
