End Point

/customer

GET, POST, PUT, DELETE

GET and DELETE requests expect parameter id of type Int32.

Top

Merging two Customers via API

POST: E.g /customer/Merge?customerIdToMerge=3&targetCustomerId=5&mergeAddresses-true.

- The paramater customerIdToMerge is the Id of the Customer (Int32) that you want to delete.
- targetCustomerId s the Id of the Customer (Int32) that you want to keep.
- mergeAddresses is a boolean. True means you want to keep the addresses of the customer that will be deleted.
