Enabling & Adding Foreign Currency

Question:

After enabling the foreign currency under company preferences, I can't find the currency setting under profile lists.

Could you tell me how I should add a foreign currency so that in the sales order I can put the value in that currency?

Answer:

1) Enable foreign currency by heading to **Admin > Company Preferences > General** and checking the box that says **Enable**

Foreign Currency

2) Create the currencies in QuickBooks Online & Sync
