

Version 1.0.23

Last Modified on 04/10/2019 11:34 am EDT

Version 1.0.23, Released March 6, 2019 - Known issues fixed and new features added as follows:

Action	Description
Added	Ability to change the customer on quotes and sales orders.
Added	Support for the French language.
Added	Alerts can now be sent to an associated sales rep.
Added	Support for Shopify Plus.
Added	You can add days to an alert's due date.
Added	Item Aliases
Added	Preferences to allow style variations to be edited and added to orders by themselves.
Fixed	Printing Kit details for items that are not kits.
Fixed	Payment getting over applied on Ship Docs.
Fixed	Calculated fields did not show all numeric properties.
Fixed	Calculated fields did not allow parentheses and exponents.
Fixed	Issues relating to importing Kits from eCommerce integration.
Fixed	Fulfillment batch was not showing orders. Also the filters on the list of orders will now also control which orders are printed.
Fixed	Adding multiple lot #'s on a work order inflated the valuation. (If this affected you please contact us as we can run a special process.)

Fixed	Could not create a linked work order for a Job Item.
Fixed	Inactive email templates showed on drop down menu.
Fixed	Editing form design failed when clicking check boxes too fast.
Fixed	Error when issuing a Refund with a gateway.
Fixed	Sending emails with a ' in the email address.
Fixed	Clone Purchase Order
Fixed	Rounding preference not functioning.
Fixed	Tax calculations for non-US companies.
Fixed	Work Order memo not saving.
Fixed	Package Type did not accept decimals for weight.
Fixed	Foreign Exchange synchronization with QuickBooks Online.
Fixed	Importing Date driven terms from QuickBooks Desktop.
Fixed	Activities not removed for deleted work orders.
Fixed	Initial adjustment did not have values from QuickBooks Desktop.
Fixed	Assemblies not being updated in QuickBooks Desktop when changed in Order Time.
Fixed	Email did not show name of contact when selected.
Fixed	Changing the Promise date on a Purchase Order caused reopening of line items.
