

QuickBooks Desktop Syncing (Right Networks)

Last Modified on 09/20/2019 11:11 am EDT

Issue:

I am trying to sync Order Time Inventory with QuickBooks. My QuickBooks file is remotely hosted by Right Networks. How can I finalize the sync?

We have two steps to follow:

- 1) The first thing to do is set up the Connector: [QuickBooks Desktop Synchronization Tool](#)
- 2) After that follow these instructions: [QuickBooks Desktop Syncing](#)

If you encounter any further issues, please [reach out to us](#).
