Feature Requests

Overview:

Were you told your question/suggestion would be added as a Feature Request?

Explanation:

A Feature Request occurs when we receive a questions or suggestion of a feature for Order Time that is not currently available.

At Order Time we track each Feature Request and periodically review that list. The Features with the most requests are put into development to be implemented into Order Time.

Optional:

While we will often try to utilize the existing system in creative ways to solve the feature requests we realize that is not always possible. We understand certain features maybe critical to your business and because of that we can discuss the costs of pushing development for must have features for your business.

We will continue to strive to offer an end to end solution for our customers!
