Missing Components on Bills of Material

Overview:

The components on your Bill of Materials may disappear if you re-organzie the columns incorrectly at the step level.

Solution:

To fix this issue you must have the ID column as the first column at the step level on the Bill of Materials. Otherwise Order Time is unable to recognize which components to pull into the Bill of Materials.

SB214-G.00 EDIT

☐ This is a phantom bill of materials

Description				
14" 316LSS Single Blade Damper with US Draft 24V Two stage indoor actuator with end switches, Flanged Collars, Viton Seal, Vee Bands
