Custom Code, Integrations, and Custom Automation Rules (CAR)

Last Modified on 07/10/2026 4:15 pm EDT

What are Custom Automation Rules (CARs)?

Custom automation rules entail behind the scenes calculations. This enables us to plugin bespoke rules to have your calculations appear in multiple areas in Order Time! Very few systems have this capability. Very few companies would offer this type of back-end customizations. All CARs are event driven, meaning they need to be tied to an action like a Save or Sync.

What are some examples of Custom Automation Rule?

1. Updating a Document custom field, based on the items or visa versa.
2. Updating a customer or item field when something happens on a sales order, ship doc etc.
3. Complex margin calculations on sales order line items.

Pricing

Pricing for Custom Automation Rules start at $400. You would need to provide us with EXACTLY how you want the CAR to work. We will provide a full quote during the discovery process.

Custom Forms & Templates

Order Time Inventory is a powerful system that can be customized to meet the specific needs of our customers. Our team of experienced developers can create custom email templates and form templates, using CSS and HTML. This allows our customers to have a unique and professional look to their communications and forms, which can help to improve their brand image and customer engagement.

Pricing

Pricing for Custom Forms and Templates start at $500. We will provide a full quote during the discovery process.

Custom Code & Integrations

In addition to everything above, we also offer custom code and integrations by quote. We've worked with a wide range of ecommerce carts such as Shopify, Wix, Squarespace, Opencart, Shift4Shop and more, and we can create custom integrations to help our customers streamline their operations and improve their bottom line. Whether you need a simple integration or a complex custom solution, our team is here to help.

Pricing

By Quote only. General turnaround time is 6 - 8 weeks from the date of purchase.
