

Custom Field Definition

Last Modified on 03/20/2023 1:35 pm EDT

Custom field definition

Each Record Type has a list of **custom fields**. You may need their definitions in order to properly populate your entities and transactions.

End Point

/customfielddefinition

GET

GET requests expect parameter of type **Record Type**. E.g CustomFieldDefinition?recordType=100 gets the custom field definitions for Item.
