

Version 1.0.34b

Last Modified on 06/30/2026 1:41 pm EDT

Version 1.0.34b - Released December 13, 2023

Known issues fixed, improvements and new features added as follows:

Note: Some of these changes were implemented as **Hot Fixes** during the development cycle. They were fixed on separate dates, but weren't published about until the official release. Our development team is constantly releasing new changes to better serve great customers like you!

Due to certain updates you may need to perform a hard refresh on certain pages like the Item Detail page. Check out these instructions on performing a hard refresh: [How to Perform a Hard Refresh and Clear Cache](#)

#	Changes	Revision
1	ADDED	You now have the ability to add Barcodes to Items on Form Templates
2	ADDED	New preference in General > Advanced: Show Only Employees for name on time entries
3	ADDED	New preference added to the ShipStation Config, "Free Shipping When Order is Over X"
4	ADDED	You can now create Kit Item Aliases. Enable the Alias Tab on the Details Page for Item. It will work for Items in the Kit Group.
5	ADDED	Added the Purchase Order Line Item API End Point
6	ADDED	When adding an Item to a Sales Order you can now select Price Level from a drop-down box
7	ADDED	New Preference in General > Advanced: Enable Doc Status Role Restrictions
8	ADDED	Created the ability to filter which Items update to your Shopify stores by Price Level. Created a drop-down for Order Source.
9	ADDED	Ability to assign a Non-Inventory Item as a Custom Shopify Item e.g. Repairs, Services

10	ADDED	Last Sale Date and Last Sale Price added to Item Reports
11	ADDED	You can use the Customer Item Price Levels to choose what gets added to which Shopify Store
1	IMPROVED	Custom Fields for Contacts can be added on Label Templates
2	IMPROVED	Added the Active Column to Customer Item Price and Currency Price - Price Levels
3	IMPROVED	Our custom loading animation has been added to the Allocate and Deallocate buttons on Sales Orders and Repair Orders. (It was already applied to Receivers and Work Orders) This prevents accidental double-clicks.
4	IMPROVED	The Tax Item field you see when Adding / Editing a Customer Address is now in Alphabetical order
5	IMPROVED	Various improvements to Time Entries on Repair Orders. Only showing Active Employees/Vendors via lookup by Name.
6	IMPROVED	Added double-click prevention to the Export CSV on our Report Viewer
7	IMPROVED	Multiple improvements to Label Bordering and Label Darkness
8	IMPROVED	Sorted out issues with Additional Fees and Credit Card fees being taxed for Non-US Customers
9	IMPROVED	Cleaned up the list that is processed when opening the Receiver Allocation screen
10	IMPROVED	For Xero we have Mapped the Customer PO to the Ref Number
1	FIXED	Fixed an issue on the Ship Doc where changing the quantity would not update the price taking into account the currency and price level combo
2	FIXED	Fixed an issue when splitting a Work Order where the class field would not follow down to the new Work Order
3	FIXED	Resolved an issue with the time to complete on Work Order Steps. It should now be calculating properly.
4	FIXED	Fixed a bug with the Outlook 365 Email / Calendar integration where the Disconnect button would not show when properly Connected
5	FIXED	Fixed an issue where Ship Doc Custom Fields were not loading quickly
6	FIXED	Working out miscellaneous bugs with the Report Scheduler
7	FIXED	Fixed an issue where creating a new Step on a Work Order would send it to the top as Step 0

8	FIXED	PriceLevelRef should now operate properly via the API
9	FIXED	Resolved an issue where adding multiple email addresses to an email with semicolons in between wouldn't work properly if you were using the Gmail integration
10	FIXED	Fixed an issue that could occur when swapping a configuration to Yes/No on a Variable Bill of Materials
11	FIXED	Fixed an issue that could occur when swapping a configuration to Yes/No from Variable on a Kit
12	FIXED	Fixed a bug which allowed you to Import an Inventory Transfer to a Bin which was not in the Location you chose
13	FIXED	Fixed a display issue that could occur when changing the quantity of Kit Line Items on a Ship Doc
14	FIXED	Fixed an issue with our Address Checker that would cause it to drop portions of the Street Name
15	FIXED	Fixed an issue with Magento 2 where it wouldn't update the Order Status
16	FIXED	Fixed an issue where Magento 2 wouldn't calculate the Sales Tax if the Zip Tax option was set
17	FIXED	Miscellaneous grammar and spelling fixes
18	FIXED	Fixed an issue that caused errors when Shopify Orders were created with Kit Items
