

Please Avoid Using < and > Symbols Within Description Fields

Last Modified on 01/19/2024 10:29 am EST

Overview

We've noticed quite a few customers using different symbols in their Description fields.

<This is the Main Item>

<<Attention to this Purchase>>

Solution

This applies to every type of Description field under an Item regardless of the tab you are on.

Please refrain from using the **less than** and **greater than** symbols within your description fields.

Avoid using < and > symbols within Order Time Inventory in general.

This can cause a constant Error 500, especially if you try to change other fields on an Item while those are in your Description text fields.
