

Exception was thrown.Details:Business Validation Error: Make sure all your transactions have a VAT rate before you save.

Last Modified on 04/03/2025 3:22 pm EDT

Symptoms:

- You get the error: Exception was thrown.Details:Business Validation Error: Make sure all your transactions have a VAT rate before you save.
- You are using QBO
- You charge or are charged VAT or GST
- You are syncing either a Ship Doc, Customer Return, Vendor Return or Receiver

Cause:

On or more items on the transactions in question do not have a Sales Tax Code.

Fix:

- On the transaction in question, click the accounting integration icon and then click 'Remove from Sync Queue'
- If not already visible, add the Sales Tax Code Column, then refresh the page
- Edit each line and select the appropriate Sales Tax Code

Prevent in the future

- Make sure each customers and vendors have default Sales Tax Codes
- Make sure each item has both a sales tax code and a purchase tax code
- If the fields are not visible, use the [Page Layout Editor](#) to add them to your pages.
