Importing - BOM Easy

Purpose:

This import easily allows you to add Steps and or components to an existing Bill of Materials. This import is designed to add Steps and Components and not to Modify existing ones.

Required Fields:

- New Items: BOM Item, Step, Step UOM, Component Item, Bom Version
- Existing Lines: ID and the field(s) you would like to update

Mapping Tips:

- To Update existing components you need the Component ID
- The Bom Version will map to the field called Name in the import Mapping. If you are not using multiple BOM Versions the BOM will still need it mapped and the Name should be called *DEFAULT*
