Importing - Kit Selection

Purpose:

The Kit Selection import allows users to import to add or update Kit Selections in an existing Kit Group. For this type of import you need the Group ID to identify which Group you are adding components onto or the Kit Selection ID to update an existing Kit Selection.

Required Fields:

- New Items: Group Id, Item Name, Qty Per, Price Per
- Existing Lines: ID and the field(s) you would like to update

Mapping Tips:

- You can use a report to get the Group IDs and/or Kit Selection IDs for mass updating
