

Sync Error - Inventory Adjustment Account

Last Modified on 08/20/2026 5:26 pm EDT

Issue:

"The inventory adjustment account must be different than the inventory asset account used for item XXXXXXXXXX". Please select a different account."

What does it mean:

The account that you selected on the adjustment is also being used on one of the individual items. You cant have the same account on a document and one of the items on that document.

Solution:

Edit the Adjustment and choose a different account.
