

Sync Error - Inventory Adjustment Account

Last Modified on 08/21/2026 9:24 am EDT

Issue:

"The inventory adjustment account must be different than the inventory asset account used for item XXXXXXXXXX". Please select a different account."

```
{"Fault":{"Error":{"Message":"Request has invalid or unsupported property","Detail":"Request has invalid or unsupported property","code":"2010"},"type":"ValidationFault"},"time":"2026-08-20T12:27:11.768-07:00"}
```

What does it mean:

The account that you selected on the adjustment is also being used on one of the individual items. You cant have the same account on a document and one of the items on that document.

Solution:

Edit the Adjustment and choose a different account.
